DETAILED ACTION

Election of Species

1. This application contains claims directed to the following patentably distinct species, from each group of species, of the claimed invention:

I. Valve shield

Species A: Figure 3

Species B: Figure 4

Species C: Figure 5

Species D: Figure 6

Species E: Figure 7

Species F: Figure 8

Species G: Figure 9

Species H: Figure 10

II. Fastener

Species A: Sutures (embodied in claim 6)

Species B: Staples (embodied in claims 8 and 9)

III. Sheet of material

Species A: Biological (embodied in claims 10 and 11)

Species B: Non-biological (embodied in claim 12)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, from each of the three groups of species, for prosecution on the merits to which the claims shall be

Art Unit: 3738

restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Javier G. Blanco whose telephone number is 703-605-4259. The examiner can normally be reached on M-F (7:00 a.m.-4:30 p.m.), first Friday of the bi-week off.
